

## **DBHDS TDO Exception Report Summary**

The attached tables display statewide data from the TDO exception reports submitted by CSBs.

The left side of each table displays the following data:

- the numbers of crisis evaluations CSBs conducted each month
- the numbers of executed (not issued) temporary detention orders (TDOs) resulting from those evaluations,
- the percent of evaluations those TDOs represent,
- the total numbers of reportable events associated with those TDOs, and
- the percent TDOs those reportable events represent.

The center part of each table displays the following data about reportable events (defined in table footnotes) involving loss of custody events:

- the total numbers of reportable events involving loss of custody,
- the numbers of those events with an emergency custody order (ECO),
- the numbers of those events without an ECO,
- the numbers of those events with an TDO executed subsequently,
- the numbers of those events in which the individual subsequently became engaged in outpatient services, and
- the numbers of those events in which the individual did not become engaged in services.

The right side of each table displays the following data about other reportable events that do not involve a loss of custody:

- the numbers of events involving medical treatment, and
- the numbers of other events (defined in the table footnotes).

The Totals row reflects the relationship of the various types of reportable events. For example, in the FY 2015 table, the 61 total reportable events included 36 events that involved a loss of custody, 17 medical treatment events, and 8 other events. The total 36 events that involved a loss of custody included 12 with ECOs and 24 without ECOs and 23 with subsequent TDOs, 2 engaged in outpatient services, and 11 never engaged.

### DBHDS TDO Exception Report Summary

<sup>1</sup> Reportable event is defined as the activity that made the event reportable to DBHDS, that is additional medical treatment warranted or loss of custody of the individual. All of these events had an ultimate outcome at the conclusion of the event.

<sup>2</sup> In some of the events, an ECO was obtained after the CSB began the evaluation but prior to obtaining a TDO and are reflected as “No ECO” in this table.

<sup>3</sup> Denotes at least one individual was released from the medical hospital without CSB knowledge.

<sup>4</sup> Other is defined as any event not directly related to medical treatment or loss of custody; for example, fax machines not operating, hospital transferred the individual without notifying the CSB, delays with admission to state hospitals, delays with access to the magistrate, late notification of ECO to the CSB, TDO expired in hospital emergency department with no hearing, or individual died during transport.

<sup>1</sup> Reportable event is defined as the activity that made the event reportable to DBHDS, that is additional medical treatment warranted or loss of custody of the individual. All of these events had an ultimate outcome at the conclusion of the event.

<sup>2</sup> In some of the events, an ECO was obtained after the CSB began the evaluation but prior to obtaining a TDO and are reflected as “No ECO” in this table.

<sup>3</sup> Denotes at least one individual was released from the medical hospital without CSB knowledge.

<sup>4</sup> Other is defined as any event not directly related to medical treatment or loss of custody; for example, fax machines not operating, delays with admission to state hospitals, delays with access to the magistrate, late notification of ECO to the CSB, TDO expired in hospital emergency department with no hearing, magistrate denied TDO petition, arrested and placed in jail
